PROFILE

I build complete web applications, from the data model to the interface: reliable APIs, polished interfaces and deployments that are easy to maintain.

EXPERIENCE

Backend developer · Sumak Desarrollo de Software y Marketing — May 2023 — Sep 2023

- Built backend services in Go with the Fiber framework.
- Wrote MariaDB stored procedures for the data access logic.

Academic projects · Universidad Peruana Unión — [pendiente] — today

- Java console application for a transport company, including the whole backend.
- Sales application in Java with Maven and a JavaFX interface.
- In progress: Vyra, a system for a dental clinic, built as a team.

PROJECTS

This portfolio and its 3D robot · Blender, Three.js, GSAP, Next.js
A robot modeled, rigged and animated with Blender scripts, exported to glTF with Draco (0.8 MB) and animated on the web with Three.js and GSAP, in sync with the interface.

DaeTrym, a cybersecurity and software website · Next.js, TypeScript, Tailwind CSS, Drizzle, PostgreSQL
Bilingual corporate website for DaeTrym, my cybersecurity and software development brand, with forms backed by its own backend, anti-spam and a strict security policy.

Warehouse system for a construction company · Python, Django, Tailwind CSS, SQLite
Django web application to track the materials in a construction company's warehouse, with stock in, stock out and a movement history.

EDUCATION

Systems Engineering · Universidad Peruana Unión — In progress
