Luis Daniel

Full Stack Developer

lui.daniel.dev@gmail.com Juliaca, Perú GitHub @LuiDaniel LinkedIn Luis Daniel luidaniel.vercel.app

PROFILE

I build complete web applications, from the data model to the interface: reliable APIs, polished interfaces and deployments that are easy to maintain.

EXPERIENCE

Academic projects · Universidad Peruana Unión Mar 2026 – today

- Java console application for a transport company, including the whole backend.
- Sales application in Java with Maven and a JavaFX interface.
- In progress: Vyra, a system for a dental clinic, built as a team.

Backend developer · Sumak Desarrollo de Software y Marketing May 2023 – Sep 2023

- Built backend services in Go with the Fiber framework.
- Wrote MariaDB stored procedures for the data access logic.

PROJECTS

This portfolio and its 3D robot · Blender, Three.js, GSAP, Next.js
A robot modeled, rigged and animated with Blender scripts, exported to glTF with Draco (0.8 MB) and animated on the web with Three.js and GSAP, in sync with the interface.

DaeTrym, a cybersecurity and software website · Next.js, TypeScript, Tailwind CSS, Drizzle, PostgreSQL
Bilingual corporate website for DaeTrym, my cybersecurity and software development brand, with forms backed by its own backend, anti-spam and a strict security policy.

Warehouse system for a construction company · Python, Django, Tailwind CSS, SQLite
Django web application to track the materials in a construction company's warehouse, with stock in, stock out and a movement history.

EDUCATION

Systems Engineering · Universidad Peruana Unión In progress

Software Engineering with Artificial Intelligence · SENATI
Technical degree · up to semester 5 of 6: Requirements analysis, Databases, Object-oriented programming, Information systems, AI algorithms, Big Data and Machine Learning.

SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS, Three.js, JavaFX, Svelte
Backend	Node.js, Express, REST, GraphQL, Go, Fiber, Python, Django, Java
Data	PostgreSQL, MariaDB, MongoDB, Prisma, Redis
DevOps and cloud	Git, Docker, Vercel, GitHub Actions, AWS
Tools	VS Code, Figma, Blender, Postman, Maven
Fundamentals	Estructuras de datos, Algoritmos, Redes, Sistemas operativos, Ing. de software, Análisis de requerimientos, Machine Learning
Languages	Spanish (native), English (intermediate)
